

BRIGHT OUTLOOK FOR BUILDING IN 1922

During the past week there has been very little done in the line of building in this city except a few interior jobs that are being brought to completion. During the week there were no new applications for building permits filed with the city engineer's office. The city engineer, Mr. Howard L. Stanton, has been out of the city for some time, but he is expected to return soon. The outlook for building in 1922 is bright, according to the city engineer, who expects a large number of new buildings to be started in the coming year. The city engineer also expects a large number of new houses to be built in the coming year. The city engineer also expects a large number of new houses to be built in the coming year.

FOUNDER OF NEW HEALTH SCIENCE HERE

"GREETED BY THOUSANDS"

Over a Thousand Unable to Gain Admittance

THE LARGE ELK'S HALL NOT LARGE ENOUGH TO HOLD THE THOUSANDS WHO CAME TO HEAR DR. LOUIS BLUMER, THE FOUNDER OF NATUREOPATHY.

The Elk's Hall had been overcrowded one hour before the time of the announced lecture.

When Dr. Blumer arrived it took him and his assistant over ten minutes to force their way through the great crowd to enter the hall and reach the platform.

He was introduced by one of the local Natureopaths, a graduate of the "Blumer College". Dr. Blumer expressed his admiring appreciation for the honor the Norwich public bestowed upon him. He said that it would be very difficult to cover the various instructive subjects he wishes to impart to the public in one or two lectures.

Natureopathy is such a great study and so highly thought of that it would be an injustice to all concerned, especially the public who were so vitally interested in health matters, therefore, a series of lectures, covering eight or ten days would not be any too much.

This will give the multitudes of people interested in health some idea of how the Natureopathic Health Science used preventive as well as restorative natural agents in normalizing conditions.

Dr. Blumer went on explaining in simple manner how Natureopathy utilizes the three agents, Mental, Mechanical and Material, and why this triplicity of science is so highly effective.

When the Doctor announced that he was ready to demonstrate, the rush for treatment was so great that it took several assistants to keep the crowd away from the platform.

Every case treated produced such gratifying results that the audience applauded for some time after each case showing their appreciation.

The following cases treated were evidently of the worst type:

A lady residing at High Street, Baltic, Conn., had been suffering from pains in head and all over cold sensation in arms, legs and feet, after receiving a short treatment, admitted a great improvement in her condition.

The next case was that of a small boy who resided at Second Street, Norwich, Conn., whose left arm had been paralyzed since birth. After having been given a ten minute treatment this child was able to move the arm to the great astonishment of the crowd as there was hardly enough muscle to suggest movement.

Another case was that of a local woman, aged seventy years, suffering with rheumatism. She had been carried on the platform by two of her friends and after a brief treatment was able to walk without assistance and almost danced with joy.

Others with various ailments were treated with the same results.

A lady who said that she had been suffering from stomach troubles for thirty-one years, was the next case treated. After twelve minutes natureopathic treatment she said "Oh! Doctor, I feel fine." "All my pain is gone."

An elderly woman was the first one to be treated yesterday. She suffered from paralysis of the lower extremities for eighteen years. After ten minutes natureopathic treatment this lady was able to walk for the first time in eighteen years.

A little girl four years of age, who had never walked having been weak and backward from infancy, was treated by the demonstrator, who brought more vital force to the limbs after only a short treatment.

An elderly gentleman of Norwich Town was then treated. His trouble started some years ago with what was believed to be rheumatism of the back. His condition gradually grew worse until his knee and hip joint became ankylosed or stiff, so that he could not lace his own shoes. After receiving the Natureopathic treatment, he was enabled to walk without his cane and could kick backward and forward to the gratification of all those present.

The next case treated was a young man who lives on Lafayette Street. He was deaf and dumb. After a few minutes natureopathic treatment he said, "The pain is all gone Doctor." And so it goes, case after case, every one showing great improvement under the new health science.

The lectures and demonstrations will continue this week at Elk's Hall, 252 Main Street, Norwich, Conn. The public is invited to bring the sick of their own choice to the hall and receive free treatments. Admission absolutely free, no collections.

The Natureopathic doctors have private offices at Room 315-316 Thayer Building, 16 Franklin Street, Norwich, Conn.

According to the Commercial Record, Shipments and orders are both ahead of production, which is 25 per cent. below normal. In 1915 the demand started with lumber stocks light, production light and shipments light, and it is the potential possibilities of an early year building movement catching basic trades unaware that is causing investors to get their projects started promptly. The weather so far in southern New England has been comparatively mild and with a continuance of this mild weather operations should start very early this year and the year 1922 should prove a record year in building.

There are several projects now in hand in Norwich and vicinity and some progress has been made on them during the past few weeks. The largest of these is the Elizabeth street school house which is now roofed in with the exception of a small portion where the hoisting apparatus is located. The windows have been set in place and much of the interior work can be done.

Work on the large garage for the Atlantic Eastern Corp. is well along and will be finished within a short time. The work on St. Mary's church is being rushed to completion as fast as the weather will permit.

At Lebanon the new high school is well along and in spite of the weather much work has been done during the past few weeks. Contractor P. E. Swenson of Norwich has this work in hand and has a force of about 20 at work on the building.

The foundation for the new Y. M. C. A. building is now being prepared.

Joseph Sigal, 44 Capen street, Hartford, who is completing an 18-banally apartment house at Ocean beach, plans the erection of a hotel building at that place this spring. It is planned to build a four-story brick structure, and to have it ready for occupancy this summer. It will be provided with steam heat. Preliminary sketches for the building are now being prepared.

Important changes are planned to the building owned by Antoni Levrowski on Bentley street, Ocean beach. An addition, 20x70 feet, will be built onto the present building of wood and stucco exterior, one story high, and will be arranged for stores. The cost will be between \$20,000 and \$40,000.

The Raymond & Alexander Lumber Co. are adding to their facilities by the erection of a new saw mill. It will be located at their plant in the rear of Howard street and will cost about \$10,000.

Building Permits.
William Kaplan, store front, 579 Main street, Cost \$400.
O. W. Paver, former window, 18 Lewis street, Cost \$100.
Raymond & Alexander Lumber Co. saw mill, rear 150 Howard street, Cost \$10,000.

Number of permits for the week, 4; estimated cost of buildings, \$1,500.

LYME.
From plans drawn by a New London architect, LeMotte Way, has been awarded the contract for the erection of the cow and horse barn for Julia Walker Co. Noyes and work will be started on at once.

Petty Thieves in New London.
Four attempted robberies were reported to the New London police over the week-end. A pane of glass was removed from a rear window at the Schwartz's Furniture Co., Bank street. The store was entered, and a cash box containing \$19 in cash, and ten dollars in I. O. U. slips taken. Mrs. Frances Wilson, 26 Columbia street, reported that her home was entered through an unlocked front window and some small articles of jewelry and some old coins stolen. Mrs. S. M. Jeter, 107 Green

street, reported that she had just returned home after two months absence from the city and that her home had been entered and a great deal of her bedding stolen. Isaac Higdon, proprietor of a shoe repairing shop at 635 Bank street, also reported a break.

CAMPBELL BEGUN FOR WOODROW WILSON FOUNDATION.
The campaign for the Woodrow Wilson Foundation was opened in Washington, D. C., Sunday afternoon at the National theatre. The theatre, with a seating capacity of 1,800, was soon crowded. Groups congregated at the rear balcony, and late comers were admitted only when space could be found.

The meeting was opened by Dr. Taylor, pastor of M. Wilson's church. The speakers were Col. John Temple Graves, Dr. Samuel T. Eliot, Hamilton Holt and Samuel Gompers.

"I speak as one of the many thousands of Americans," said Dr. Eliot, "who like fair play and who admire pluck and perseverance whether it wins or loses; who believe that not failure but loss of aim is crime, and who judge intentions and actions not by their success or failure but by their goal and who recognize that Woodrow Wilson's aim, in Lincoln's phrase, was 'something that held out a great promise to all the people of the world for all time to come.'"

"He pointed us to a splendid vision and we do not propose to let that vision slip from our grasp. We are going to have a new vision of service, a new respect for ourselves, a new enjoyment of levity and sacrifice, and he showed us how to apply these powers to the redemption of a crumbling world."

The Wilson foundation has two objectives: first to establish certain awards for conscientious service to community, and second to perpetuate the memory of the man who was willing to sacrifice his life for the world.

The Norwalk committee realized that it will not be able to give a personally selected list of names to the foundation. It is therefore, willing to subscribe to the fund and they urge them to send their subscriptions to the local treasurer, Henry F. Parker.

In addition to the list of names, the following have been authorized to receive subscriptions: J. A. Desmond, P. F. Spear, Mrs. Joseph F. Williams, William W. Hill, George R. Raymond, John J. Cerk, Mrs. James J. Cerk, Mrs. Fred Dwyer, Miss A. E. Taylor, Earl T. Mathewson, John R. Fowler, John M. Lee, Arthur Box, Taffville, and Patrick T. Connell, Norwich Town.

WELCOME TO VISITORS.
In accord with its long established custom of promoting better public understanding of the telephone business, The Southern New England Telephone Company, through its employees, is issuing invitations to subscribers to visit its operating rooms and, in the larger cities, other interesting parts of the telephone buildings.

Anyone with an interest in the tremendous task of providing telephone service to 100,000 stations in Connecticut, from which more than 300,000,000 calls were handled in the past year, is welcomed to the telephone building and, accompanied by experienced telephone men, will be shown through this intensely interesting public service plant. Employees of the company now have invitation cards which they are authorized to use.

HEAD ACHE AND BODY ACHE.
There are various symptoms of kidney trouble—rheumatic pains, backache, sore muscles, stiff joints, and "always tired" feeling. Mrs. George Morgan E. Fairchild, Vt. writes: "My head ached and my whole body ached so I could not sleep. Foley Kidney Pills gave me relief. They heal and strengthen weak, disordered kidneys and bladder and help them in their work of filtering the blood and casting out of the system the impurities that cause pain and disease. Prompt action. Lee & Osgood Co."

Camden Man's Amazing Message to Rheumatism After Suffering Intense Agony for Many Years—He Wants to Tell Others.

Dr. Bignall: I simply had to write and tell you what your wonderful Camphor has done for me. For many years I suffered the tortures of Rheumatism as only those who have it know. At the same time I had a terrible cold, covered with sores, the sharp pains were so severe, I could not sleep. Had to get up to rub and scratch. It almost drove me crazy. I tried doctor after doctor and all kinds of medicine I was told to take, which only left me worse. I could not bend my knee. I am a steamfitter by trade and had to give up my work. Seeing your advertisement in a paper, I thought I would take another chance and told my daughter to get me a package of Camphor. You can imagine my surprise after using Camphor. I started to get better right away. After using two lots of Camphor I am well and happy and have gone back to work. I shall never forget the day I took a chance on Camphor. After who the cure, I feel good to be well again. Robert W. Yessels, 2917 High St., Camden, N. J.

REAL ESTATE SALES AND MORTGAGE LOANS.
In Norwich during the past week there were 9 sales of real estate or one more than the number for the same week a year ago. The mortgage loans for the respective weeks were \$59,600 and \$12,900.

There were five sales of real estate in New London during the past week which was one less than the same week in 1921. The mortgage loans for the respective weeks were \$5,400 and \$3,200.

NEW LONDON.
Estimates have been received for the proposed new bath house to be erected by Arthur G. Budd at Ocean beach. The highest bid, exclusive of the plumbing and electrical work, was about \$115,000 and the lowest \$72,000. The structure is to be 135x168 feet, having two floors, both of which are to be of reinforced concrete. The building itself will be of wood, on concrete piers, and about 1,000 tons of broken stone will be required and 25,000 bags of cement. There are to be 1,400 bath compartments, with public sanitary arrangements and electric lights.

Joseph Sigal, 44 Capen street, Hartford, who is completing an 18-banally apartment house at Ocean beach, plans the erection of a hotel building at that place this spring. It is planned to build a four-story brick structure, and to have it ready for occupancy this summer. It will be provided with steam heat. Norwich, Conn. Phones 23 and 24

used to issue to the public, introducing the holders to the exchange manager. Upon presentation of one of these cards at the manager's office during business hours, the visitor is taken for a thorough inspection of the telephone property and the wonders of telephony are explained.

The operating room is of most interest to nearly all the visitors. A glance at the solitary line of active and conscientious workers will do more than anything else can to dispel the absurd notion that they spend their time discussing fashions, reading novels and chasing gum. Happily, with a better public understanding of the telephone business, and a particularly of the operators' highly important part in it, few persons hold the old-fashioned notion about telephone operators.

The sight of a modern telephone switchboard is a revelation to those who have not seen one and the rapidity with which telephone connections are set up by the young ladies in a splendid example of co-operative effort. No less interesting is the operating work on the big toll boards through which more than 10,000,000 calls were handled in Connecticut last year.

In the larger cities the company's restaurants and the other parts of the plant which have to do with the mechanics of maintaining telephone service, will be visited. On the whole a trip through the telephone plant is well worth while as instructive on the way in which this dependable public utility functions 24 hours a day, every day in the week.

WORCESTER FRIENDS ENTERTAIN FOR MISS EDITH BOYNTON.
In Worcester on Saturday evening last Miss Edith Louise Boynton of this city was the guest of Raymond W. MacMonte at a private dance given in the ballroom of the Hotel Bancroft. An interesting dinner was served, dancing continuing until a late hour. Miss Boynton has been the guest of Mr. MacMonte's parents, Mr. and Mrs. William J. MacMonte, of Columbus park. On Sunday evening the latter gave a dinner party in honor of Miss Boynton at their Columbus park home. Covers were laid for 12, the table decorations being in pink and white. The ladies received corsage bouquets of Columbia roses. During the evening Miss Boynton rendered, with her usual skill and technique, four piano selections, much to the delight of those who attended.

The program was as follows:
Minuet from Don Giovanni.....Mozart
Ballet from the 3d suite.....Bach
Scherzo, Op. 30.....Bethoven
Minuet from Sonata.....Schubert
Miss Boynton willingly responded to several encores. She is a talented and an unusually accomplished musician, having studied under Prof. James H. White of Norwich, finishing her education in Boston in 1915, and at present taking a special course of studies in New York city. She is of an attractive and fascinating personality and is well known throughout musical circles in Connecticut, especially in Norwich, her home city, where she has given her services freely in the interest of church and charitable organizations. In addition to appearing professionally in this city, Miss Boynton is always warmly greeted by her many friends and while in Worcester has been the guest of Mr. and Mrs. W. J. MacMonte and daughters, Misses Phyllis and Helen, and the former's eldest daughter, Mrs. Leon W. Richardson, of 11
